PROFESSIONAL SUMMARY

Data scientist with almost 2 years of experience in data, from SQL and management reports to pipelines and dashboards in production. At Pacto Soluções, I built Python and Airflow pipelines that bring Zendesk and Jira data into BigQuery for 18 clients and migrated 20+ KPI dashboards to Power BI, checking every number against the source. Looking for data roles that combine analysis and engineering.

TECHNICAL SKILLS

Python • SQL • DAX • Pandas • NumPy • Scikit-learn • Machine Learning • NLP (Embeddings) • Data Analysis
Apache Airflow • GitHub Actions • ETL/ELT • Google BigQuery • MySQL HeatWave • PostgreSQL • SQL Server • Firebird • MongoDB
Power BI • Looker Studio • Data Modeling • Oracle Cloud (OCI) • Docker • Git/GitHub • LLMs and MCP

PROFESSIONAL EXPERIENCE

Pacto Soluções
May 2026 - Oct 2026

Data Scientist · Goiânia, Goiás, Brazil

- Built Python ETL/ELT pipelines orchestrated with Apache Airflow, integrating the Zendesk and Jira APIs with Google BigQuery, with a centralized configuration that scaled the pipelines to 18 clients.
- Migrated 20+ KPI dashboards from Looker Studio to Power BI (active members, churn, cancellations, revenue and delinquency), reconciling every number with the source, per unit and consolidated.
- Created and fixed DAX measures and modeled a daily history of more than 400K rows (444 days) to track each student's status.
- Traced production failures to their root cause, including a bug that inflated ticket counts by tens of thousands, and reprocessed the history, validating it against the source.
- Worked on the data migration from BigQuery to MySQL HeatWave (Oracle Cloud), and designed, directed and validated a full-stack NPS prototype (Java/Spring, PostgreSQL and React) with 300+ automated tests.

Escolar Manager
Feb 2025 - May 2026

IT Services · Goiânia, Goiás, Brazil

- Gathered requirements and analyzed data to identify business needs and support improvements to internal processes.
- Wrote SQL queries and management reports to support decision-making and the analysis of business indicators.
- Handled and integrated structured and semi-structured data (JSON).
- Supported the analysis of inconsistencies and data quality improvements, ensuring the integrity and reliability of the information.

Pacto Soluções
Aug 2022 - Nov 2024

Customer Relationship Consultant (Mid-level) · Goiânia, Goiás, Brazil

- Analyzed technical requests and identified error patterns reported by clients, proposing effective solutions.
- Gathered requirements for specific client needs, translating them into specifications for the development team.
- Worked closely with the development team, relaying feedback and improvement suggestions to enhance the software.

PROJECTS

busca_vagas: Job Radar with ETL and NLP

ETL on GitHub Actions: jobs from 5 sources, scored against my resume with embeddings, clustered with K-means, applications sent via Gmail.
Python, GitHub Actions, PostgreSQL, Embeddings (NLP), Scikit-learn, Next.js

Data Pipeline with Apache Airflow

Weekly Airflow DAG that extracts data from an API and saves raw data and curated tables, running on Docker Compose with CeleryExecutor.
Python, Pandas, Apache Airflow, Docker, PostgreSQL, Redis, ETL

Credit Card Fraud Detection

Classification of fraudulent transactions on real data, comparing Logistic Regression and Random Forest, with results in Power BI.
Python, Pandas, Scikit-learn, Power BI

EDUCATION

Postgraduate Specialization in Data Science - IPOG - Instituto de Pós-Graduação e Graduação — Jan 2026 - In progress

Associate Degree in Systems Analysis and Development - IPOG - Instituto de Pós-Graduação e Graduação — Aug 2023 - Dec 2025

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification - Stanford — 2026

Power BI for Business Intelligence and Data Science - Data Science Academy — 2026
